TC-001: First-Time User Greeting

Description: Verify that HR Buddy provides appropriate context and orientation for a new user.

Preconditions: Fresh conversation with no prior interaction.

User Query: Hi

Expected Result: HR Buddy introduces itself and clearly explains its purpose without assuming prior familiarity.

Actual Output:

"Hi there! I'm HR Buddy, your friendly Artscape colleague here to help you with questions about leave, public holidays, and reimbursements. How can I assist you today?"

Result: PASS

Notes: HR Buddy introduces itself by name, explains its purpose, identifies its supported topics, and uses a friendly, professional tone. It does not assume prior familiarity.

Improvement Applied: Updated the first-time greeting instruction to require HR Buddy to introduce itself by name and briefly explain its role.

Retest Result: PASS — the actual output meets all expected criteria.

TC-002: Returning User Flow

Description: Verify that HR Buddy adapts to a returning user with a more direct interaction.

Preconditions: HR Buddy is available; a specific opening query is used without a general greeting.

User Query: Can you help me with public holidays?

Expected Result: HR Buddy addresses the request directly with minimal unnecessary orientation and does not repeat its full introduction.

Actual Output:

"I'd be happy to help with that! At the moment, I don't have access to the verified holiday calendar, so I recommend reaching out to hr@artscape.com for the official dates. Is there anything else about leave or reimbursements I can assist you with?"

Result: PASS

Notes: HR Buddy responds directly to the public-holiday request without repeating its full introduction. It transparently explains that the verified holiday calendar is unavailable and provides the appropriate HR contact.

Retest Result: PASS — the actual output meets the expected criteria.

TC-003: Clarification on Incomplete Input

Description: Verify that HR Buddy asks a clarifying question when required information is missing.

Preconditions: Active HR Buddy conversation.

User Query: Can you help me with my leave?

Expected Result: HR Buddy asks a specific, relevant clarifying question instead of guessing the user's intent.

Actual Output:

"I'd love to help with your leave! To make sure I provide the right information, are you looking for our leave policy, the process for applying, or your current leave balance?"

Result: PASS

Notes: HR Buddy asks one clear clarification question and offers three relevant options: leave policy, application process, and current leave balance. It maintains a friendly, supportive tone without assuming the user's intent.

Retest Result: PASS — the actual output meets all expected criteria.

TC-004: Avoiding Over-Questioning

Description: Verify that HR Buddy does not ask unnecessary clarifying questions when the user's intent is already clear.

Preconditions: Active HR Buddy conversation.

User Query: How do I submit a reimbursement?

Expected Result: HR Buddy responds directly to the clear request without redundant clarification questions. It provides numbered steps when verified procedure details are available.

Actual Output:

"I understand you'd like to submit a reimbursement. Unfortunately, I don't have the specific submission steps available in my current records, so please contact hr@artscape.com for the correct process and forms. Is there anything else I can help you with today?"

Result: PASS

Notes: HR Buddy understands the user's intent, avoids unnecessary clarification, transparently explains that the verified submission steps are unavailable, and directs the employee to hr@artscape.com. The reimbursement procedure itself remains unavailable in the current knowledge base.

Retest Result: PASS — the response meets the criteria for avoiding over-questioning.

TC-005: Task Execution & Confirmation

Description: Verify that HR Buddy confirms the outcome of a task and offers a relevant next step or follow-up.

Preconditions: Active HR Buddy session; task request submitted.

User Query:

"Create a list of five polite questions I can ask HR during a meeting. Then confirm that the list is ready and offer to help me turn it into an email."

Expected Result:

HR Buddy provides five relevant questions, confirms that the list is ready, and offers to help turn it into an email.

Actual Output:

"Hello! I'm HR Buddy, your friendly and professional colleague. I'm here to help Artscape employees with questions about leave, public holidays, and reimbursements.

I've put together a list of five polite questions for your HR meeting:

1. Could you please clarify the current policy for applying for extended leave?
2. What are the upcoming public holidays for the remainder of the year?
3. What is the typical process for submitting and tracking reimbursements?
4. Are there specific documents or receipts required for professional development expense claims?
5. How can I check my current leave balance to plan for my next break?

The list is ready! Would you like me to help you turn these questions into an email?"

Result: PASS

Notes:
HR Buddy completed the requested task by generating five polite questions relevant to an HR meeting. It explicitly confirmed that the list was ready and offered a relevant next step by suggesting that it could turn the questions into an email. The response was friendly, professional, and aligned with the expected behavior.

Retest Result: PASS — all three expected criteria were satisfied.

TC-006: Ambiguous Input Handling

Description: Verify that HR Buddy handles genuinely ambiguous requests appropriately by asking for clarification rather than assuming an interpretation.

Preconditions: Active HR Buddy session.

User Query:

"Can you check my status?"

Expected Result:

HR Buddy asks a concise clarifying question to determine whether the user means a reimbursement status, a leave request status, or something else. It must not assume the user's intent.

Actual Output:

"I'd be happy to help, but I'm not sure which status you're referring to. Could you please clarify if you're asking about the status of a reimbursement, a leave request, or something else?"

Result: PASS

Notes:

HR Buddy correctly identified the ambiguity in the word "status." It asked one clear, relevant clarification question and offered three possible interpretations without assuming the user's intent or inventing any information.

Retest Result: PASS — the expected behavior was satisfied.
